Datum: am 13.10.2020 um 18:30

Titel: Java-Treff: Kafka Special with Jakub Scholz (Red Hat)

The Java-Treff in Oktober will get very special to us:

We welcome **Jakub Scholz**, who's working at RedHat as a designated Kafka and messaging expert.

Jakub will not only introduce Kafka and its usage to us but also have a few words on his current project the Strimzi operator.

Jakub offered to assemble a talk especially for us, so please stay tuned.
